**ABSTRACT:**

A system (100) and method for connecting remote player devices (110) to regulated host gaming devices (160) in a network to provide remote game play. A host gaming device (160) is configured to provide game information to a plurality of remote player devices (110) to allow remote play of the host game device (160). Whether each remote player device (110) is permitted to receive gaming data is based upon, at least in part, the geographic location of the remote player device (110).
